SUMMARY

Computer Engineering student who ships production software: a multi-tenant SaaS platform in active development and a freelance web app sold and delivered to a paying client. Strong in TypeScript, Node.js and Supabase/PostgreSQL, with automated testing (Vitest, Playwright) and Scrum team experience. Workshop facilitator at COMPDES, the Central American computing congress, two years running.

TECHNICAL SKILLS

Languages	TypeScript, JavaScript, SQL (PostgreSQL), Python, Java, C++
Frontend	React, Next.js (App Router), HTML, CSS, Tailwind CSS, shadcn/ui, Framer Motion
Backend	Node.js, Supabase (Edge Functions, RLS, Auth, Realtime), REST APIs
Data / State	PostgreSQL, Zustand, React Hook Form, Zod
Data Analysis	pandas, scikit-learn, Plotly, Dimensional modeling (star schema)
AI & Automation	Claude Code, OpenClaw, OpenRouter, n8n
Tools & Platforms	Git, GitHub, Vercel, Cloudflare, Netlify, Render, Google Maps API, Linux (CachyOS)
Testing & Process	Vitest, Testing Library, Playwright, Scrum, Jira, Gitflow

EXPERIENCE

CoreBase / DojoBase

Mar 2026 – Present

Founder & Solo Developer | Next.js · TypeScript · Supabase · PostgreSQL · pnpm monorepo

Remote — Costa Rica

Built GymBase v1, a multi-tenant gym SaaS live on a custom domain, then rewrote it as CoreBase, a reusable platform layer.

DojoBase, the first product on CoreBase: ranks, classes, sparring, promotions, tournaments and billing for martial arts academies.

Tenant resolved from a JWT claim and isolated with Supabase RLS, with automated RLS tests; 40+ merged PRs.

Fixed production-grade bugs: recurring-class timezone drift, local-date handling, SECURITY DEFINER on auth triggers.

CaneleApp

Oct 2025 – May 2026

Freelance Full-Stack Developer | Node.js · PostgreSQL · Supabase · Google Maps API

Costa Rica

Designed, sold and delivered a route and order management app for a bakery — first paid client project, shipped Dec 2025.

Built the backend with Node.js and Supabase (PostgreSQL); Google Maps API for route visualization.

Kept it running 24/7 on free-tier Netlify and Render via a keep-alive Edge Function; shipped a v2 rework in May 2026.

Tacha — Web Development course

Aug 2026 – Present

Full-Stack Developer, Scrum team of 6 | Next.js · React · Supabase · Vitest · Playwright · Jira

Tecnológico de Costa Rica

Collaborative shopping-list app run as real Scrum: Jira sprints, gitflow, one ticket per PR, peer QA before every merge.

Built the list features, set up Vitest + Playwright and CI on PRs, and ran system QA on each sprint deliverable.

Tecnológico de Costa Rica

Feb 2026 – Present

Teaching Assistant — Algorithm Analysis

Campus San Carlos, Costa Rica

Graded assignments and exams and gave feedback on algorithmic problem-solving and complexity analysis.

SPEAKING & COMMUNITY

AI Agents From Scratch — Hands-On Workshop

Jul 2026

COMPDES 2026

El Salvador

Designed and delivered a workshop on building AI agents from scratch: personal finance, second brain, dev assistant, PDF extraction.

Built on OpenClaw + OpenRouter as a two-step install; tested on CachyOS, Ubuntu, Raspberry Pi 4 and Windows 11 (WSL2).

Git & GitHub Practical Workshop (4 hours)

Jul 2025

COMPDES 2025

Guatemala

Delivered a 4-hour workshop on real Git workflows, with a group activity using pull requests to practice team development.

EDUCATION

Tecnológico de Costa Rica — B.S. in Computer Engineering

2023 – 2027 (expected)

Campus San Carlos, Costa Rica

LANGUAGES

Spanish (Native speaker) · English (B1 — Intermediate)
